EXPERIENCE – 5 Years (Full Time)

Kathir-Sudhir Automation, India – Front-End Developer

September 2017 - October 2018 | Web Development |

www.kathirsudhirautomation.com

Project Environment: Web Application Development.

Developed a responsive Web Application for Kathir-Suthir Automations using ReactJs, Back-end API endpoints using NodeJS and testing using Jest.

Contributed towards developing efficient and pure functional component of the web application.

Responsible for production deployment on AWS and managing application change control in GitHub.

Developed original content, update existing and expand upon content coming over from the product and ensure website functionality, monitor assets and report on website performance.

Wipro Technologies, India - Software Developer

July 2012 - Dec 2015 | www.wipro.com

Project: CIS_IT_CCIT_SEARCH

Project Environment: Web-based Applications, Java, Python, SQL.

Cisco Search project vision is to create effective search websites for Cisco which brings together various Cisco related information like Employees, Cisco products, etc. in the search. Responsible for the development, support, maintenance, and implementation of small to medium components of a project module.

CERTIFICATIONS

Certified Scrum Master - <ID-000901923> - 2019 – Validity (March-05-2023) - Link for verification:

<https://www.scrumalliance.org/community/profile/arajkumar6>

PROJECTS

EduFinderApp: <https://github.com/abinayas037/EduFinderApp>

Created this website which helps to find the educational institutions nearby. Used ReactJs, Html, CSS, Geolocation and Foursquare API.

Gmail-Mui: <https://github.com/abinayas037/gmail-mui>

Created this project to learn about Material-UI React. In this project, I have taken the Gmail page as a sample and created a look-alike responsive Gmail page using material-UI. And deployed this code in Netlify.com.

Bookshelf: <https://github.com/abinayas037/bookshelf>

Created this website to find different types of books and can read it for free like google playbooks. I have used google books Api, react-redux, redux-thunk, material-UI.
